

37 CFR 1.83(a) requires, “The drawing in a nonprovisional application must show every feature of the invention specified in the claims. However, conventional features disclosed in the description and claims, where their detailed illustration is not essential for a proper understanding of the invention, should be illustrated in the drawing in the form of a graphical drawing symbol or a labeled representation (e.g., a labeled rectangular box).” 37 CFR 1.83(a). Applicants respectfully submit that each of the refrigeration apparatus devices as claimed are already shown and identified in the drawings in accordance with 37 CFR 1.83(a). For example, the compressor is labeled with reference numeral 32 and is shown in FIGS. 1 and 2 and is described at length in the specification. Similarly, the condenser is labeled with reference numeral 44 and is shown in FIGS. 1 and 2 and is described at length in the specification. Finally, the throttle valve is labeled with reference numeral 62 and is shown in FIGS. 1, 2, and 3 and is described in the specification. As each of the identified refrigeration apparatus devices is already shown in the figures in accordance with the requirements of 37 CFR 1.83(a), Applicants respectfully request that these objections to the drawings be withdrawn and the application proceed to issuance.

**CONCLUSION**

Applicants point out that all of the pending claims are in condition for allowance as noted in the Office Action. If for any reason, the Examiner is unable to move the application to issuance and believes that an interview would be helpful to resolve any remaining issues, he is respectfully requested to contact the attorney on record.

Respectfully submitted,

Date: September 29, 2010

  
Raymond R. Ricordati, III
